2. Soviets stated that the institute was formerly a convent which had been converted to atomic research purposes.
3. In the institute were the following German scientists, who asked the PWs to make known their deportation after they returned to Germany:

Eduard Urban
Horst Rautenbusch, a physicist from Bochum
Anton Assmely, from Berlin
Manager Max Adam.

25X1 ☐ Comment:

This is the first report on an alleged atomic research institute in the northern town district of Moscow. The names of the German deportees were not previously known. According to the information contained in the report they seem to be forbidden even to write home. Investigations of them have been initiated to check the correctness of this report. As the PW had been sent to the Moscow institute from PW Camp Dolgoprudnaya for this express work, there is good reason to believe that there exists an operational connection between the Meteorological Institute in Dolgoprudnaya and this Physical Institute in Moscow-Vladikino (37°37'E/55°51'N).

1 Annex: Alleged Atomic Research Institute in Moscow-Vladikino.
